Amendment to the Claims:

The listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (Currently amended): A molded block for a paving-stone eovering, made of concrete, having approximately the shape of a cube, each face of said molded block paving-stone having at least a portion which is planar, the distances between the planar portions of the opposite faces of said paving-stone molded block being substantially equal, at least a first one of the faces of said paving-stone molded block being substantially planar over substantially its entire surface area, at least a second one of said faces having at least one rounded portion extending toward one side edge of said paving-stone molded block over at least 1/6 of said at least one face and wherein each face of the paving-stone can be used as a horizontal upper face.

Claim 2 (Cancel)

Claim 3 (Currently amended): A set of <u>paving-stones</u> molded block made of concrete comprising a first <u>paving-stone</u> molded block according to claim 1, a second <u>paving-stone</u> molded block having an oblong shape, with a width and height of edge dimension L equal to that of said <u>first paving-stone</u> eube and a length of edge dimension 2L, whereby said second <u>paving-stone</u> molded block can be rotated through 90° and/or 180° about its horizontal longitudinal axis during laying, with a constant block <u>paving stone</u> height.

Claim 4 (Currently amended): A set of <u>paving-stones</u> molded blocks made of concrete comprising a first <u>paving-stone</u> molded block according to claim 1, and a second <u>paving-stone</u> molded block-in the form of a one-piece block which is square in plan view and with dimensions of four <u>eubes</u> of the first <u>paving-stone</u> with the size of said first mentioned cube lying beside one another.

Claim 5 (Currently amended): A <u>paving-stone</u> molded block according to claim 1, wherein the radius of curvature of the rounded portion moving toward said side edge is formed as a curve with, in plan view or side view, a radius of curvature which decreases constantly toward the said side edge.

Claim 6 (Currently amended): A <u>paving-stone</u> molded block according to claim 1, wherein a face of the <u>paving-stone</u> molded block is shaped to form a clothoid extending toward said side edge over approx. 1/4 to 1/6 of the <u>paving-stone</u> length.

Claim 7 (Currently amended): A <u>paving-stone</u> molded block according to claim 1, wherein at least one side edge of said <u>paving-stone</u> molded block is formed to be sharp-edged.

Claim 8 (Currently amended): A <u>paving-stone</u> molded block according to claim 1, having clothoidal rounded portions on at least two opposing side faces.

9-11 (Canceled)

Claim 12 (Currently amended): A <u>paving-stone</u> molded block as recited in claim 1, wherein said <u>paving-stone</u> molded block has two opposite faces which are substantially planar over their entire surface areas.

Claim 13 (Currently amended): A laid set of <u>paving-stones</u> blocks comprising <u>paving-stones</u> molded block according to claim 1, laid adjacent to one another in a pattern wherein some of said <u>paving-stone</u> molded block of said set have as their upper surfaces the faces which are substantially planar over substantially their entire surface areas and some of said <u>paving-stones</u> molded blocks of said set have as their upper surfaces the faces having rounded portions, wherein the upper surface of each of the blocks paving stones of said set is at the same height.

Claim 14 (Currently amended): A molded block for a paving-stone eovering, made of concrete, having approximately the shape of a cube and having three sets of opposite faces, each face of said paving-stone molded block having at least a portion which is planar, the distance between the planar portions of each set of opposite faces being substantially equal to the distance between the planar portions of each other set of opposite faces, at least a first one of the faces of said paving-stone molded block being substantially planar over substantially its entire surface area, at least a second one of said faces having at least one rounded portion extending toward one side edge of said paving-stone molded block over at least 1/6 of said at least one face and wherein each face of the paving-stone can be used as a horizontal upper face.

Claim 15 (Cancel)

Claim 16 (Currently amended): A set of <u>paving-stones</u> molded blocks made of concrete comprising a first <u>paving-stone</u> molded block according to claim 14, a second <u>paving-stone</u> molded block having an oblong shape, with a width and height of edge dimension L equal to that of said <u>first paving-stone</u> eube and a length of edge dimension 2L, whereby said second <u>paving-stone</u> molded block can be rotated through 90° and/or 180° about its horizontal longitudinal axis during laying, with a constant block <u>paving-stone</u> height.

Claim 17 (Currently amended): A set of <u>paving-stones</u> molded blocks made of concrete comprising a first <u>paving-stone</u> molded block according to claim 14, and a second <u>paving-stone</u> molded block in the form of a one-piece block which is square in plan view and with dimensions of four cubes with the size of said first mentioned cube lying beside one another.

Claim 18 (Currently amended): A <u>paving-stone</u> molded block according to claim 14, wherein the radius of curvature of the rounded portion moving toward said side edge is formed as a curve with, in plan view or side view, a radius of curvature which decreases constantly toward the said side edge.

Claim 19 (Currently amended): A <u>paving-stone</u> molded block according to claim 14, wherein a face of the <u>paving-stone</u> molded block is shaped to form a clothoid extending toward said side edge over approx. 1/4 to 1/6 of the cube length.

Claim 20 (Currently amended): A <u>paving-stone</u> molded block according to claim 14, wherein at least one side edge of said <u>paving-stone</u> molded block is formed to be sharp-edged.

Claim 21 (Currently amended): A <u>paving-stone</u> molded block according to claim 14, having clothoidal rounded portions on at least two opposite faces.

Claim 22 (Currently amended): A <u>paving-stone</u> molded block as recited in claim 14, wherein said <u>paving-stone</u> molded block has two opposite faces which are substantially planar over their entire surface areas.

Claim 23 (Currently amended): A laid set of <u>paving-stone</u> blocks comprising <u>paving-stones</u> molded blocks according to claim 14, laid adjacent to one another in a pattern wherein some of said <u>paving-stones</u> molded block of said set have as their upper surfaces the faces which are substantially planar over substantially their entire surface areas and some of said <u>paving-stones</u> molded blocks of said set have as their upper surfaces the faces having rounded portions, wherein the upper surface of each of the <u>paving-stones</u> molded blocks of said set is at the same height.
